

Capability Statement

The Patriot Group, a Southern California based utility services contractor, was founded in 2016 by a team that began their lives as public servants in the US Military. Seeing unmet needs in the utility services space, The Patriot Group has grown quickly to provide the utilities with the industry's most transparent, trustworthy, and effective solutions as a 4PL Contractor. As a current signatory with IBEW 1245 & IBEW 47, we can offer services under the guidance of union labor contracts.

Services

4PL (AGGREGATED 3PL) LOGISTICS

- Land Location Identification, Procurement and Regulatory Clearance
- Materials Handling, Forecasting and Management
- Lay-down Yards and Warehouse Management
- Program and Project Management

DISASTER RESPONSE

- Disaster Response Planning
- Cleanup: Demolition, Clearing & Tree Removal, Flood Water Removal, Traffic Control
- Logistics: Materials Management, Basecamps/Yard Management, Consulting

TRAFFIC CONTROL

- Traffic Plans: Traffic Permits, Job Studies, Freeway Closures
- Traffic Studies: Job Hazard Analysis, Speed Surveys, Consulting
- Flagging

FIRE SERVICE

- Vegetation Management: Defensible Space, Utility Structure Clearing Mastication & Forest Restoration
- Contract Fire Resource (CFR): Strike Teams, Wildland Fire Fighting, Consulting
- Environmental Services: Environmental Site Assessment, Wetlands Delineation and Permitting, Storm Water Pollution Prevention, Noise Monitoring

CONSTRUCTION SERVICES

- Plumbing and Pipework: Commercial Plumbing, Gas & Propane, Hydro Stations, Marine
- Electrical Services: Temp Power, Electrification & Charging Stations, Solar Farms, Solar Chargers,
- Earthwork: Pole Digging, Strategic Undergrounding
- In-Field Services: Pole Coating (Mapping, Marking, Coating), Pole Repair, Transformer Coating
- Commercial Construction: New Build, TNI

ENGINEERING

- Utility: Geotechnical, Hydro, Civil, Structural
- Construction Management: Field Construction Advisor, QA/QC, Program & Project Management

DRONE SERVICES

- Electric System Inspections: QA/QC, Thermal Mapping, LiDAR, Pole Integrity Inspections, Geo-Tagging
- Vegetation Management: Herbicide Spraying & Seeding, AI-Enabled Mapping
- High Resolution Photo and Video

CERTIFICATIONS:

Select Projects:

Greater Bay Area Emergency Restoration (EER) Program

After a wetland delineation survey, a major utility laydown yard in the Bay Area had to be quickly cleared and reconfigured under strict environmental guidelines. The Patriot Group Environmental Services and 4PL Logistics teams worked together efficiently to inventory and stage the earthquake material in the affected laydown yard and another warehouse while avoiding impact on protected seasonal wetlands with biological, air, and water concerns.

Electric Systems Hardening (ESH) Program

The Patriot Group has helped a large regional utility implement its Electric System Hardening program to address wildfire risk by modernizing critical and aging infrastructure to reduce the risk of power failures and potential sparks. Our 4PL Logistics teams manage projects, materials, and laydown yards. Our Fire Services teams assist with vegetation management, defensible space, storm-water pollution prevention, and other site-specific environmental services and noise monitoring. Our Utility Construction Team provides in-field services, including pole welding and pole coating, as well as offering electrical services, including temp power.

Drone Investigation, Assessment And Repair Program (DIAR)

The Drone Investigation, Assessment, and Repair (DIAR) Program is part of a major utility company's Wildfire Mitigation Plan (WMP) efforts. The DIAR Program enhances the evaluation of overhead electric power lines and equipment within identified High Fire Threat District Tier 3 areas. The Patriot Group team assessed drone footage, managed and kitted materials, and equipped contractors through the laydown yards we manage to repair power lines and equipment throughout the county.

Strategic Undergrounding Program

Strategic undergrounding is one of several projects in a utility's Wildfire Mitigation Plan that aims to significantly reduce the chances of utility-related wildfires and reduce impacts on important facilities like schools, libraries, medical centers, and fire stations. Our 4PL Logistics, Fire Services, and Utility Construction Teams help implement and continue to improve a comprehensive wildfire risk mitigation program by: Replacing wood poles with fire-resistant steel poles, including covered conductors, deploying groundmen for vegetation management and defensible space clearing, building a sophisticated weather monitoring network, updating fire and weather forecast models' operating protocols, and building partnerships to enhance the region's overall ability to respond to wildfires.

EV Charging Infrastructure Program

To reduce greenhouse gas emissions and meet customer demand for more EV chargers in the region, a leading utility company implemented a rebate program to reduce the cost of EV charging infrastructure and installation at about 100 multifamily and workplace locations over two years that support underserved communities and small businesses. The Patriot Group's 4PL Logistics Team supports this program by providing project management and materials kitting through the laydown yards we manage.

Utilities Disaster Response Planning & Management

As part of our strategic collaboration with a top national utility, The Patriot Group Disaster Response and 4PL Logistics teams plan and manage Laydown Yards across the United States, improving infrastructure to assist electric cooperatives and municipalities in maintaining superior operations through efficient and effective disaster response.

Traffic Control Services

In a growing utility region, traffic is projected to grow by 30% over the next two decades. The Patriot Group's Traffic Control team provides flaggers to assist utility providers, supporting the growth of the region's infrastructure.

Contractor's Licenses:

C-31 Traffic Control Contractor

C-36 Plumbing Contractor

C-61 Limited Specialty Contractor

D-31 Pole Installation &

Maintenance Contractor

D-42 Non-Electrical Sign Installation

D-49 Tree Service Contractor

D-63 Construction Clean-Up Contractor
